DETAILED ACTION

Drawings

1. Although the applicant has been given a shortened period for response to this application, the examiner has included this objection to the drawings in an effort to expedite prosecution of the application. A response to this drawing objection is not required. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the retrieving means, comparison means, and optical network terminal of claims 4 and 7 must be shown or the feature(s) canceled from the claim(s). The reference wavelength means, storage means, and comparison means of claim 9 must be shown or the feature(s) canceled from the claim(s). Components to perform the various functions claimed in claim 12 must be shown or cancelled from the claim. No new matter should be entered.

Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted

Art Unit: 2633

by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Election/Restrictions

2. This application contains claims directed to the following patentably distinct species of the claimed invention: Species I shown in Figures 3 and 4, Species II not shown in the figures but requiring remote retrieving means and comparison means of claim 4 to determine signal quality, Species III not shown in the figures but including the limitations of claim 9 wherein a reference wavelength means, storage means, and comparison means are used to determine if a laser transmitter is malfunctioning, Species IV of claim 12 not shown in the figures but drawn to a network component capable of signal amplification, attenuation, processing, addition, deletion, or retransmission of an optical signal, .

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

Application/Control Number: 09/855,600

Art Unit: 2633

809.02(a).

the election, applicant must indicate which are readable upon the elected species. MPEP §

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Agustin Bello whose telephone number is (703)308-1393. The examiner can normally be reached on M-F 8:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jason Chan can be reached on (703)305-4729. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
